Step 1 of 6: Create New Table - Table Name and Description

You have chosen to create a new table. Tables allow you to group similar items together, so that you can manage them more efficiently. Tables are for your internal use only — the information you enter in the following steps will not be displayed to your customers.

Fields marked with an asterisk (*) are required and cannot be left blank.

Table Information

Table Name * ?

(e.g., Shirts)

Description ?

Note: Table names cannot be edited once they are saved. Please choose your table name carefully.

(e.g., All shirts and tops except T-shirts.)

Step 2 of 6: Create New Table - Mandatory Fields

Now it's time to configure the fields that will be available to you when you add items to your new table. The fields below are required for all tables. If you like, you can choose to make the sale-price and ship-weight fields required (which means that an item can't be created in this table unless the field is filled in). You can also choose whether any of the fields below should be pre-populated with a default value.

Mandatory Fields
